

FOR STATIC PAGE USE THIS CODE AND CHANGE YOUR IMAGE ID FOR THIS: qrCodeImage

```
import wixLocation from 'wix-location'; // Import the correct module

$w.onReady(function () {
  // Get the current page URL
  let currentUrl = wixLocation.url;

  // Log the current URL to the console for debugging
  console.log('Current URL:', currentUrl);

  // Generate the QR Code URL
  let qrCodeUrl =
`https://api.qrserver.com/v1/create-qr-code/?size=150x150&data=${encodeURIComponent(currentUrl)}`;

  // Assign the QR Code URL to the image element
  let qrCodeImage = $w('#qrCodeImage');
  if (qrCodeImage) {
    qrCodeImage.src = qrCodeUrl;
  } else {
    console.error('Element with id "qrCodeImage" not found.');
```

Check next page for the other code.

FOR YOUR DYNAMIC PAGE USE THIS CODE AND CHANGE YOUR IMAGE ID  
FOR THIS: qrCodeImage

```
import wixLocation from 'wix-location'; // Import the Wix location module

$w.onReady(function () {
  // Get the full URL of the current dynamic page, including the {ID}
  let currentUrl = wixLocation.url;

  // Log the URL to the console for debugging purposes
  console.log('Dynamic Page URL:', currentUrl);

  // Generate the QR Code URL using an external QR code API
  let qrCodeUrl =
`https://api.qrserver.com/v1/create-qr-code/?size=150x150&data=${encodeURIComponent (cu
rrentUrl)}`;

  // Select the image element on the page and assign the QR Code URL to its `src`
property
  let qrCodeImage = $w('#qrCodeImage'); // Ensure you have an image element with ID
'qrCodeImage'
  if (qrCodeImage) {
    qrCodeImage.src = qrCodeUrl; // Set the image source to the QR code URL
  } else {
    // Log an error if the image element is not found
    console.error('Element with id "qrCodeImage" not found.');
```
